

Autism Tasmania is proud to announce a new partnership with Care2Serve Tasmania.

It is now time for the many carers across the autism community to be recognised and supported more. **Autistic families are carers too!**

Are you connected to other people just like you?

Are you supporting an autistic family member?

Are you getting the support you need for yourself?

This partnership focuses on **YOU**, the carer - not just the person you are caring for. We will find out your needs and help you:

- Connect you with other autism community carers
- Gain new skills
- To take a break and focus on you
- Access counselling supports
- Access equipment and other supports you need to balance your carer role and your life.

Together we aim to provide better support and understanding to the families and carers of Autistic people.

Are you keen to learn more about the new services and supports available to you as an autism carer?
